ANNUAL REPORT

OF THE

MEDICAL OFFICER OF HEALTH

FOR THE YEAR 1933.

To The Minister of Health, the Chairman and Members of The Long Eaton Urban District Council.

Gentlemen,

I have much pleasure in presenting my Annual Report for the year 1933.

Owing to the deficiency of the annual rainfall your Council deemed it advisable to take a temporary supply of water for the Nottingham Road area from the deep borehole supplying the local Gas Company, and also to take steps to obtain an additional permanent supply. It was not found necessary to curtail the water supply during the year.

The scheme for the provision of an Open Air Swimming Bath at Grange Park was completed and forwarded to the Ministry of Health for their sanction, and at the time of writing this has not been received.

The acute need for houses in Long Eaton has been met and the vacant house is now becoming a fairly common feature. The question at present is one of an economic rent, and the general demand by the working classes is for a good type of house with modern conveniences.

The Infantile Mortality was very low, being 46.66. It has only once been lower, in 1928 when it was 31.4. The general Death Rate was 9.63, and the average for England and Wales was 12.3.

I am, Gentlemen,

Your obedient servant,

JOHN MOIR.

Medical Officer of Health.

Public Health Department,

Town Hall, Long Eaton.

July, 1934.

STATISTICAL SUMMARY FOR 1933.

Area—Land 3,191:955 acres
Elevation of District .89 –147 O.D.
Population (Census, 1931) 22,340
Population, 1932 (Registrar General) 22,830
Density of Population per acre 6.9
Number of Inhabitated Houses, 1933 6,388
Rateable Value, Year ended 31st March, 1934 £137,410
Sum represented by a Penny Rate £535
Rates levied—General 11 - in the £
Births Legitimate 157 M., 132 F. — 289 } 300
Birth Rate 13.44
Still Births Legitimate III M., 7 F. — 18 1 1 M., 2 F. — 2 1 20
Rate per 1000 total (live and still) births 31.25
Deaths (113 M., 107 F.) 220
Death Rate 9.63
Number of women dying in, or in consequence of, childbirth From Sepsis 0 From other causes 2
Deaths of Infants under 1 year of age, per 1000 births: Legitimate 9 M., 3 F. Illegitimate 1 M., 1 F. Total 14 Rate 46.66
Deaths from Measles (all ages) ,, 0 ,, 0.00
,, ,, Whooping Cough (all ages) ,, 0.00
,, ,, Diarrhœa (under 2 years of age) ,, 1 ,, 0.04
Unusual or excessive mortality during the year Nil

SUMMARY (FOR REFERENCE) OF NURSING ARRANGE-MENTS, HOSPITALS, ETC., AVAILABLE FOR THE DISTRICT.

Professional Nursing in the Home.

- (a) General. The General Nursing of the District is provided by the Long Eaton Sick Nursing Association, which is inadequate.
- (b) FOR INFECTIOUS DISEASE. The County Council provide a special nurse for infectious disease when required.

Midwives.

The following five Midwives were certified as practising in the District during the year, and these are controlled by the County Council:—

Mrs. Vowles, 31, Salisbury Street

Mrs. Levers, 19, Dockholme Road

Mrs. Fox, 35, Shakespeare Street

Mrs. Wilson, 81, Breedon Street

Mrs. Lomax, 2, Cedar Avenue

The Supervising Health Visitor made 18 routine and 30 special inspections during 1933.

Clinics and Treatment Centres.

- (a) MATERNITY AND CHILD WELFARE CENTRE.
 - No. 4, Nottingham Road, Long Eaton (Monday and Thursday afternoons).
- (b) School Clinic.

For Minor Ailments; dental, ear, nose, throat and ophthalmic. No. 4, Nottingham Road, Long Eaton.

(c) Tuberculosis Clinic.

Town Hall Grounds (Tuesdays, 10.30 to 1).

(d) VENEREAL DISEASE.

There is no centre in this district for advice or treatment. Patients have the opportunity of attending at the Derbyshire Royal Infirmary as arranged by the Derbyshire County Council.

Males.
Mondays, 6 to 8 p.m.
Wednesdays, 6 to 8 p.m.
Saturdays, 2 to 4 p.m.

Females.
Mondays, 3 to 5 p.m.
Thursdays, 6 to 8 p.m.

Hospitals provided or subsidised by the Local Authority or by the County Council.

(a) Tuberculosis. 1—Derbyshire Sanatorium, Chesterfield.

2—Penmore Pavilion (Females).

3—Whitworth Hospital, Darley Dale (Males).

4—Bretby Hall Orthopædic Hospital.

- (b) Maternity Hospitals. Nightingale Home, Derby.
- (c) Women's Hospitals. Nottingham and Dcrby.
- (d) *Chlidren's Hospitals. Nottingham and Derby.
- (e) FEVER.

The Isolation Hospital, Draycott, which is provided jointly by the Long Eaton Urban District Council, the Alvaston & Boulton Urban District Council, and the Shardlow Rural District Council.

(f) | Smallpox.

Meadow Lanc Isolation Hospital. Long Eaton. Patients are also received from the Alvaston & Boulton Urban District Council and the Shardlow Rural District Council.

(g) *General.

Nottingham Hospital and Derby Royal Infirmary.

(h) Public Assistance.

Derbyshire County Council Public Assistance Hospital, The Grove, Shardlow.

* Voluntary Institutions. | Long Eaton U.D.C.

Ambulance Facilities.

(a) For Infectious Cases.

An Ambulance is provided and maintained by the Shardlow Joint Isolation Hospital Committee for the removal of Scarlet Fever and Diphtheria patients.

Number of Scarlet Fever patients removed 51
,, Diphtheria ,, ,, 2

(b) For Non-Infectious and Accident Cases.

The two Motor Ambulances are stationed at the Fire Station, Tamworth Road, and are available at any time, day or night.

The use of the Ambulance is free to Long Eaton residents for a limited radius of 15 miles from the Fire Station, and two persons are allowed to accompany the patient to Hospital.

Number of cases removed:-

To or	from	the Nottingham General Hospital	1321
1)	,,	Derbyshire Royal Infirmary	115
,,	,,	other Hospitals, etc.	271
			1,707

Total Mileage covered—18,667 miles.

Rules and Charges.

Long Eaton residents may have the use of the Ambulance to and from outside areas at a charge of 9d, per mile each way, above the 15 miles allowed free. The Ambulance is allowed to attend calls outside of the Urban District at the discretion of the Superintendent of the Fire Brigade, on payment of 1.6 per mile each way.

WATER SUPPLY.

Although there has been abnormal drought during the year it has not been found necessary to curtail the supply to consumers owing to the fact that other supplies have been available in Long Eaton.

The mains throughout the town have been extended where building operations have taken place.

During the year a sample of water was forwarded to the County Analyst for Analysis, and the following is the result:—

SEWAGE DISPOSAL.

A scheme for new low level intercepting sewers has been approved by the Council and tenders are now advertised by sanction of the Ministry of Health.

Further Sanitary Requirements.

- 1.—The provision of a Public Abattoir.
- 2.—Public Baths.
- 3.—Swimming Baths.

Factory and Workshops Act, 1901.

There were 76 Workshops on the Register at the end of the year.

During the year five references to contraventions remediable under the Public Health Acts were received from H.M. Inspector of Factories, and also two Notices of Occupation.

1. INSPECTION OF FACTORIES, WORKSHOPS, AND WORKPLACES.

Including Inspections made by Sanitary Inspectors.

OUTWORKERS' HOMES.

2 lists were received from manufacturers in the Urban District and four from other local authorities, containing 17 names; a list of four persons employed in the Stapleford Rural District was forwarded to that Authority.

All the persons were engaged in lace net mending.

Each outworker was visited, the home being found in a satisfactory state. No infectious disease has occurred in an outworker's home during the year.

ANNUAL REPORT.

of the Sanitary Inspector.

To the Chairman and Members of the Long Eaton Urban District Council.

GENTLEMEN.

I herewith present my Annual Report, as Sanitary Inspector, for the year ended 31st December, 1933. The report on the Public Cleansing Service is for the financial year ending March, 1934.

The tabulated work does not adequately express the amount of work carried out, especially with regard to Housing, and it is pleasing to record that owners and agents generally are co-operating in the carrying out of this important work, otherwise, the results would not prove so favourable.

HOUSES INSPECTED UNDER THE HOUSING ACT, 1930

Name of Ward	No of Houses Inspected.	No. of Houses in which Defects existed.
Derby Road Ward	 32	 31
Nottingham Road Ward	 29	 26

floors	of schools prior to sweeping			34	galls.

MEADOW LANE ISOLATION HOSPITAL (SMALLPOX).

The administrative work of this Institution is carried out by your Inspector.

INSPECTION AND SUPERVISION OF FOOD.

FOOD AND DRUGS ACTS, etc.

The administration of the above Acts is carried out by the Derbyshire County Council.

Mr. R. W. Sutton, F.I.C., County Analyst, has kindly supplied the following information:

The number of samples collected under the Food and Drugs Adulteration Act in the Urban District during 1933 was 58, which included 30 samples of milk.

There were no prosecutions under the Act, but two Vendors were cautioned for selling milk deficient in fat and one selling milk with added water.

MILK.

The supply of milk produced and sold in the Urban District is small when compared with the quantity produced and imported

from the adjoining districts. It is from samples of the imported supplies that we receive adverse reports.

With regard to sanitary conditions met with, general care and thoroughness is exercised with the business of milk production.

The production of clean milk is a simple matter, and requires clean methods in the management of the cattle and the cleansing, sterilization and suitable storage of milk vessels and utensils.

Sale of Ice Cream.

The premises where Ice Cream is made and sold were visited. In two instances the attention of the Vendors was called to the condition of their premises, but generally the premises were found in good condition. 57 inspections were made to 48 premises.

MEAT AND OTHER FOODS.

Slaughterhouses.

The slaughterhouses are visited at all times (including Sundays and Evenings when necessary). The occupiers continue to co-operate with the Department and recognise their trade as one carrying great responsibilities.

The inspection of Meat and Foods calls for much time, and is one of the important responsibilities devolving upon the Department.

The requirements of the Meat Regulations continue to be well observed, and the Byelaws are very well adhered to, and any intimation given with regard to contraventions is usually promptly complied with.

Routine Visits to Slaughterhouses		 	631

OFFENSIVE TRADES.

One annual application was received and granted for permission to carry on the trade of tripe boiling. The premises were inspected on 12 occasions and were found to be well conducted.

There were no contraventions noted during the year.

Fish Friers.

The occupiers appear to take a keen interest in the cleanliness of the premises and the prompt removal of offal, and fully realize that the trade has now become an important and popular one in providing a useful and valuable food.

Visits to Fishmongers and Fish Friers were made on 34 occasions.

FACTORIES AND WORKSHOPS.

An effort has been made to give publicity with regard to health and cleanliness in the factories.

The use of the common sanitary conveniences in factories is much abused, and one is at a loss to comprehend the habits of some employees. Much could be done for the convenience and welfare of the workers, if they would have more consideration for their employer's property, and the welfare of their co-workers.

In several instances publicity posters of the Health and Cleanliness Council have been periodically supplied, and where this has been inaugurated an improvement in the conditions has resulted.

Many employers have yet to learn that it is on behalf of the elean worker that an effort should be made. Increased interest in welfare work by the management of factories, would, I believe, bring about improved conditions, and greater eare would be taken of his property, while at the same time the status of the worker would be considerably increased.

The following is a summary of the work earried out at the Factories and Workshops during the year.

Factories.

Sanitary conveniences repaired			 6
Foul and Obstructive Sanitary conve	niences c	leansed	 18
Drains relaid or repaired			 3
Offensive Aceumulations removed			 2
Other defects			 3

Workshops.

Foul and obstructive sanitary conven	iences cle	ansed		17
Sanitary conveniences repaired		, .		2
Want of cleanliness			* *	4
Premises unfit for use as Workshop				1
Accumulations of refuse removed			,	1

TENTS, VANS, SHEDS, Etc.

The caravans attending the two annual wakes which are held on the field belonging to the Council were inspected, and as usual, were found to be in a clean and sanitary condition. 56 caravans were inspected.

Sanitary and dustbin accommodation was provided by the Council, and the Cleansing Department attended to the regular removal of refuse, etc.

The encampment and occupiers of caravans has called for much attention, and I am of the opinion that further powers should be given to Local Authorities to deal with caravan dwellers.

No person should be allowed without the previous consent of the Council to let or permit to be used, any land for occupation by any Tent, Van, Shed or similar structure used for human habitation until the site has been approved and the necessary requirements provided.

SMOKE ABATEMENT AND ATMOSPHERIC POLLUTION.

The usual observations have been taken for smoke abatement and a number of occupiers and stokers have been interviewed and advice given with a view to preventing a nuisance.

The stokers generally exercise care in their work and co-operate with the Department when their attention is drawn to any excess of smoke emitted.

During the year twelve stokers were interviewed, and eleven letters were forwarded where an excess of black smoke was emitted.

WATERCOURSES.

In the estimates for the year 1933-34, £300 was allocated for the cleansing of the main water courses in the district, and the work was carried out by your Engineer and Surveyor.

In addition, intimation notices were served on nine occupiers of land abutting on to water courses to cleanse the same, and one notice was served for pollution and obstruction, and in each instance the notices were promptly complied with.

No serious case of pollution was discovered during the year.

RAG FLOCKS ACTS, 1911 & 1928.

The furniture and upholstery trades have been inspected for the purpose of the above Acts. The use of Rag Flocks does not now appear to be extensive, and where they are used, the manufacturers obtain a guarantee from the suppliers. It was not found necessary to take any samples for the purpose of analysis.

SANITARY SUPERVISION OF MUSIC HALLS THEATRES, ETC.

Ministry's Circular, 1921, No. 120.

There are three places of amusement in the Urban District—the Scala, the Palace and the Empire. These have been inspected on 20 occasions, and a high standard of cleanliness has been maintained.

PETROLEUM ACTS.

Number of Premises licensed for Petroleum:

			Janua	ry, 19	33		30
			Decer	nber,	1933		32
,,	"	,,	Carbide	of Ca	lcium		10
,,	Visits (Petro	ol Stores)					49
,,	,, (Carl	oide Stores))				12
Total stor	rage capacity	for Petrol	is		28,0	00 galls	•
2.2	,,	Carbid	e			846 1	bs.

The regulations have been well observed. All new underground tanks are tested at 5lbs, air pressure before approval.

During the year four new Petrol Pumps with a storage capacity of 2,000 gallons have been installed.

The total amount received from Petroleum and Carbide Licenses during the year was £20.5s. 0d.

INSPECTION OF CANAL BOATS.

Number of Boats inspected during 1933	 19
,, , conforming to the Acts and Regulations	 19
,, , infringing the Acts and Regulations	 ()
Total number for which the cabins were registered	 68
,, ,, occupying the cabins	 57
Details of occupants:—	
Male adults	 27
Female adults	 8
Children of school age	 15
Children under school age	 7

The boats generally were found in a good state of repair and clean condition and no case of infectious disease was met with.

RATS AND MICE (DESTRUCTION), ACT, 1919.

The administration of the Rats and Mice (Destruction) Act has been delegated to the Long Eaton Urban District Council by the Derbyshire County Council.

The following report was forwarded to the Minister of Agriculture and Fisheries and the County Council with reference to the action taken during the year.

Number	of inspections of premises				257
2 / (21113 0 1			• •	• •	2015.3
,,	Notices served under section 5	5			Nil
7 7	cases in which the Local Autl	nority	have dest	royed	
	rats under Section 5				Nil
2.2	prosecutions under the Act				Nil

The following is a summary of the premises treated for rats:—

Dwelling-house	es		 		28
Factories			 		6
Workshops			 		1
Slaughterhouse	ès.		 		1
Premises where	e animals	are kept	 	• •	4
Farms			 		3
Shops			 		4
Sewage Dispos	al Works		 		1
Miscellaneous		• •	 		4

The means of destruction employed has been by baiting, smoke machine and Cyanogas Rat Pump.

During Rat Week posters were displayed in the district calling attention to the damage done by rats, and requesting owners and occupiers of land to co-operate with the Local Authority in the destruction of the same. 48 letters were sent to various premises where infestation was likely to take place.

In addition, the sewers in the town were baited and good results obtained, and premises where signs of infestation were found were treated with the Cyanogas Rat pump, and baits were also laid.

The sewers in the town have been periodically inspected, and systematically baited where signs of rats were found. During the year a total of 5,000 baits were laid in the sewers, and a large proportion were taken.

In 15 instances where rats were found to be gaining access to yards, passages, etc., from defective drains the drains, were opened up and repaired.

The Cyanogas Rat Pump has been used on 12 occasions during the year with good results.

34 complaints were received during the year, and these were given prompt attention.

PUBLIC CLEANSING SERVICE.

The Collection and Disposal of House and Trade Refuse.

I have pleasure in presenting my sixth annual report on the working of the Cleansing Department during the year ended 31st March, 1934.

The service has been well maintained and carried out in a satisfactory manner. The controlled tipping continues to give satisfaction. During the year four deputations from other local authorities visited the town to inspect our methods of collection and disposal.

The motor transport is now working to its maximum capacity, and an additional motor vehicle is required for refuse collection.

The wheels on the bin trucks have been converted from solid rubber tyres to pneumatie, and this has given greater efficiency in the collection and removal of sanitary dustbins.

The total number of premises from which refuse was collected at 31st March, 1934, was 6,844, an increase of 303 during the year. The total weight of refuse removed was 5,780 tons, and the total number of loads deposited on the tip was 6,884, equal to 400 cubic yards of refuse per week.

Classified Sanitary Conveniences and Receptacles.

Total N	Number (of water closets	 	 6985
